

SCOTTY SEEKER™

The Scotty Seeker™ represents a radical advancement in Downrigger trolling technology providing anglers with a clear, straightforward method to monitor water conditions.

Temperature, depth and speed are constantly monitored by the Seeker probe and relayed anywhere on the boat via MFD, smartphone, or tablet. Refresh rates ranging from 5 to .5 seconds.

The Seeker system comes with everything you'll need to get started, including a hydrodynamic probe, hydrophone, a communication hub, and a rapid charging station that delivers over 100 hours of operation per cycle.

Developed by Airmar™— the world leader in marine acoustics – and backed by Scotty's service and expertise, the Seeker offers cutting edge performance paired with legendary support and reliability.

Built For The Hunt™

DEPTH

High precision pressure sensor
Depth Accuracy: 0 - 100m/
328 ft: ±1.5 inches/±3.8 cm

TEMPERATURE

High precision temperature sensor with data sampling rate capable of detecting thermoclines
Temperature sensor accuracy: ±0.1°C (±0.36°F)

OPERATIONAL DEPTH

From 1 ft (0.33m) to a maximum depth of 328 ft (100m)

SPEED

Airmar Gen 2 Paddlewheel that delivers industry-leading 0.34 mph (0.3 knots) start-up speed with accurate linearity correction

BATTERY

Integral rechargeable lithium-ion battery with 100+hrs per cycle.
10min charge = 10hrs of use.
3.5hrs for a full charge from zero

LOW DRAG

Hydrodynamic design to cut through water

PROBE MODES

Data refresh rate every 5 seconds on normal mode or every half second on thermocline mode

SEEKER APP

Easy to install and use

UNIQUE IDENTITIES

Assignable probe identifiers by numbers and locations on your boat

CONSTRUCTION

Designed, tested, manufactured and assembled by Scotty® and Airmar®

CONNECTIVITY

Bluetooth, wireless connectivity and ethernet

EXPANDABILITY

Four probes can be used simultaneously with one system

COMPATIBILITY

Compatible with IOS & Android devices as well as LOWRANCE® Elite and HDS, GARMIN® displays with OneHelm, SIMRAD-NSX, NSS Evo and NSO. Furuno-TZtouch3 and TZtouchXL. RAYMARINE®-Axiom 2 Pro and Axiom+ B&G- Zeus® 3S MFDs

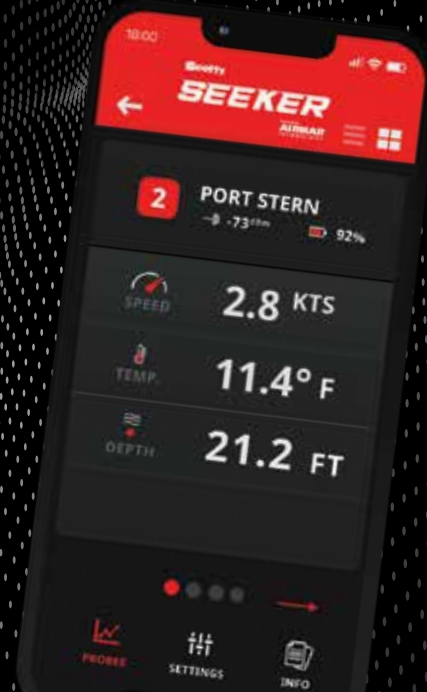

UNITS OF MEASUREMENT

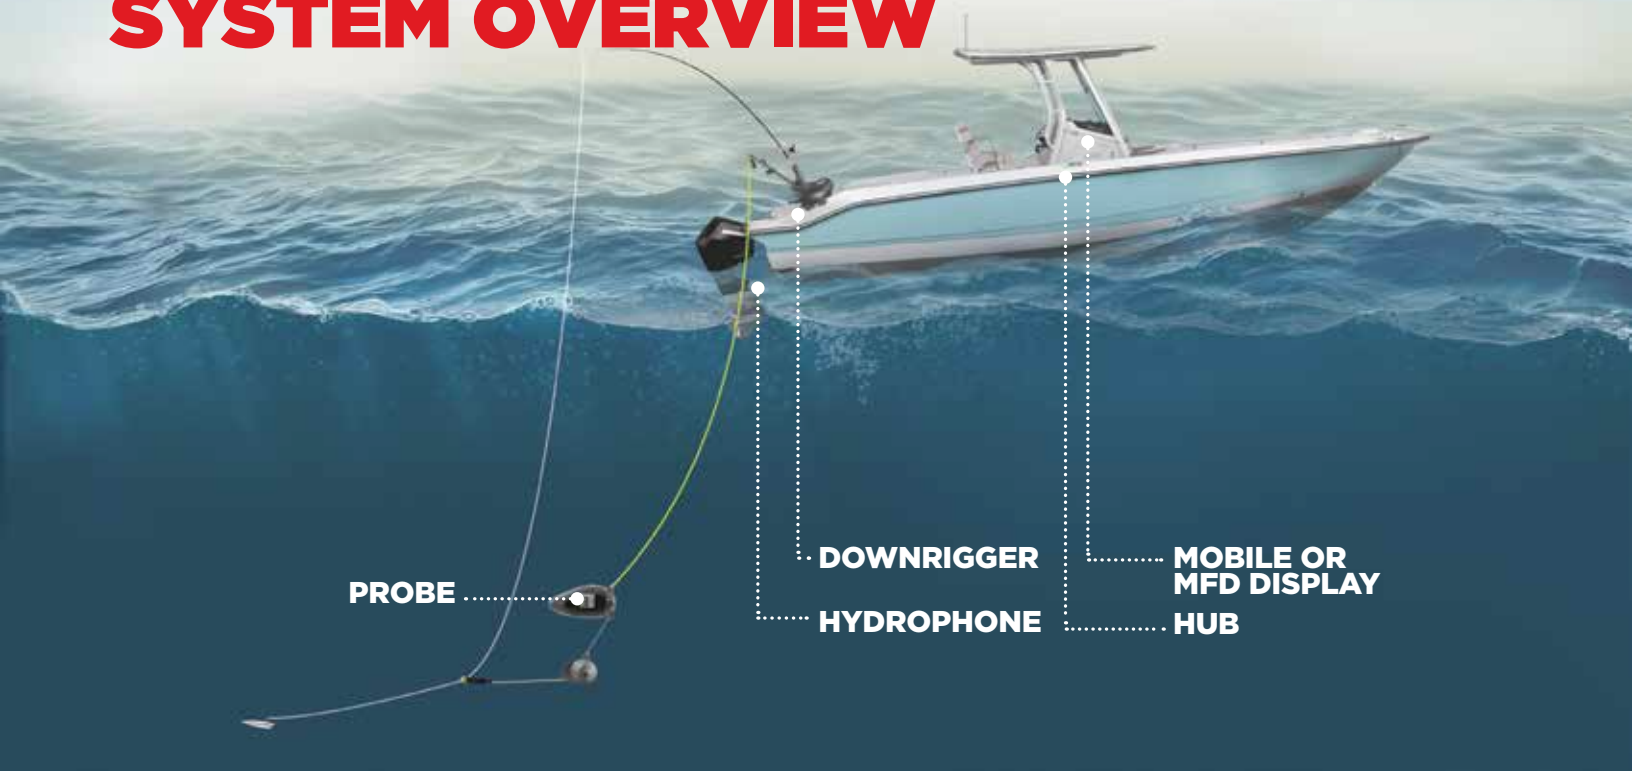

Fahrenheit/Celsius; feet/meters; MPH/KPH/KNOTS

SCOTTY SEEKER SYSTEM OVERVIEW

5000 SEEKER COMPLETE SYSTEM

The Scotty Seeker™ package includes one probe, one charging dock, one communication hub, one hydrophone, one power cord, one stainless steel leader and one major boost in fishing confidence.

SEEKER PROBE

Purpose built optimal performance to cut down drag through the water.

HYDROPHONE

Ultrasonic transducer technology. Designed by Airmar® and based on the popular P66 and TM165HW transducer.

COMMUNICATION HUB

Built-in wireless security between the hub and your mobile devices.

STAINLESS STEEL LEADER

A leader to separate your probe from your cannonball.

POWER CORD

6' - 12V marine grade power cable.

PROBE CHARGER

Designed to securely hold your probe in place while wireless charging.
